## GRAPHALLOY BEARINGS

LONG WEARING • LOW FRICTION  
SELF LUBRICATING (Contain NO Oil)

GRAPHALLOY is a combination of Graphite with Babbitt, Copper, Bronze, Cadmium, Silver or other metals as required and has been successfully used for 40 years. GRAPHALLOY is specified for miniature instrument bearings as well as large heavy-duty industrial bearings where other types of materials have failed.

## DRY APPLICATIONS

1) For heavy duty, low speed, with vibration where grease would squeeze out. 2) Medium duty where oiling is neglected or impossible, or in presence of lint or dust. 3) Extremely low or high temperatures where oil would solidify or volatilize. 4) Where oil MUST NOT be used (as in food processing).

## SUBMERGED APPLICATIONS

1) In water, sea water, gasoline, acids, dyes or foods (non-contaminating). 2) At high speeds under special conditions.

GRAPHALLOY is widely used for self-lubricating piston rings, seal rings, thrust and friction washers, pump vanes.

Use our "40 years" of design experience! Write or phone for full information.
